VAN DAMME DIGITOUR AES/EBU & DMX 110 OHM PRE-JACKETED CABLE

The Van Damme Digitour cables are black jacketed versions of the Green Series AES Microphone cable and 2, 4, 8, 12 and 16 pair pre-jacketed multicores, introduced in response to user requests. Green Series is often used for DMX512 control signals, but lacks the unobtrusive jacket colour often needed by the Lighting and Presentation markets. Low capacitance and stable characteristic impedance make these cables ideal for DMX512 as well as AES/EBU and analogue audio signals

Applications

- DMX transmission for lighting fixtures and devices
- Digital audio signal transmission for installations, equipment racks and devices
- Any 100 to 110 Ohm balanced data application such as RS422, RS485, and timecode

Application Notes

- Suitable for analogue balanced audio and AES/EBU as well as DMX512
- 2, 4, 8, 12 and 16 way multicores have 26AWG conductors for reduced overall diameter; single cable has 24AWG conductors
- Ultra-pure oxygen free copper for outstanding sonic integrity
